

## **Process for Fidelity Monitoring**

The following strategies are currently implemented to ensure the fidelity of the program implementation across the country.

- At each workshop training, the authorized TJQMBB trainer will emphasize the importance of conducting in-class fidelity checks performed by a certified peer instructor or a trainer.
- In preparation for fidelity evaluation, each trained instructor is encouraged to film the teaching class once per year.
- Certified instructors are required to meet the fidelity requirements set by the program.
- Services related to fidelity evaluation can be provided (via video) up to 1 hour by the developer upon request.

The strategies outlined in this sheet are subject to change as we continue to seek effective methods of fidelity evaluation to ensure high quality of program delivery in practice.
